TOP SECRET

MEMORANDUM FOR: Deputy Director (Support)

SUBJECT: Reference attached memorandum on [REDACTED]

25X1A

1. The security restrictions imposed by the DD/I practically precludes any real contribution by the Management Staff because we can't get enough necessary information. Therefore, herewith are some very modest changes on which we have been able to agree with the offices. This is the best we can do as of today.

2. It is to be noted that [REDACTED] starts (with respect to security) in the same way that ELINT and some other very classified projects have started. All of these others have been broken down, and this one will be some day, too. It will be only at that time that you will expect to get any thorough-going Management scrutiny re organization and numbers to pursue as yet unstated functions.

3. It is further to be noted that the Office of Personnel will be equally stuck in its classification responsibility. So, in effect, from both the standpoint of Management as well as Personnel, our actions at this stage will amount to not much more than a form of blank check.

4. We will put a followup date for 90 days on this to see if the security restrictions can be relieved to any extent [REDACTED]

25X1A

Chief, Management Staff

1 Attach.
